—  
**SPECIALISTS**  
in  
**PILLARS**

The background of the image is a photograph of an industrial facility, likely a warehouse or manufacturing plant. It features a complex network of blue and grey metal beams and supports. A large, translucent corrugated metal roof structure is visible at the top, with light filtering through. The overall scene conveys a sense of industrial strength and engineering.

**Pillars**  
Trucks and Trailers

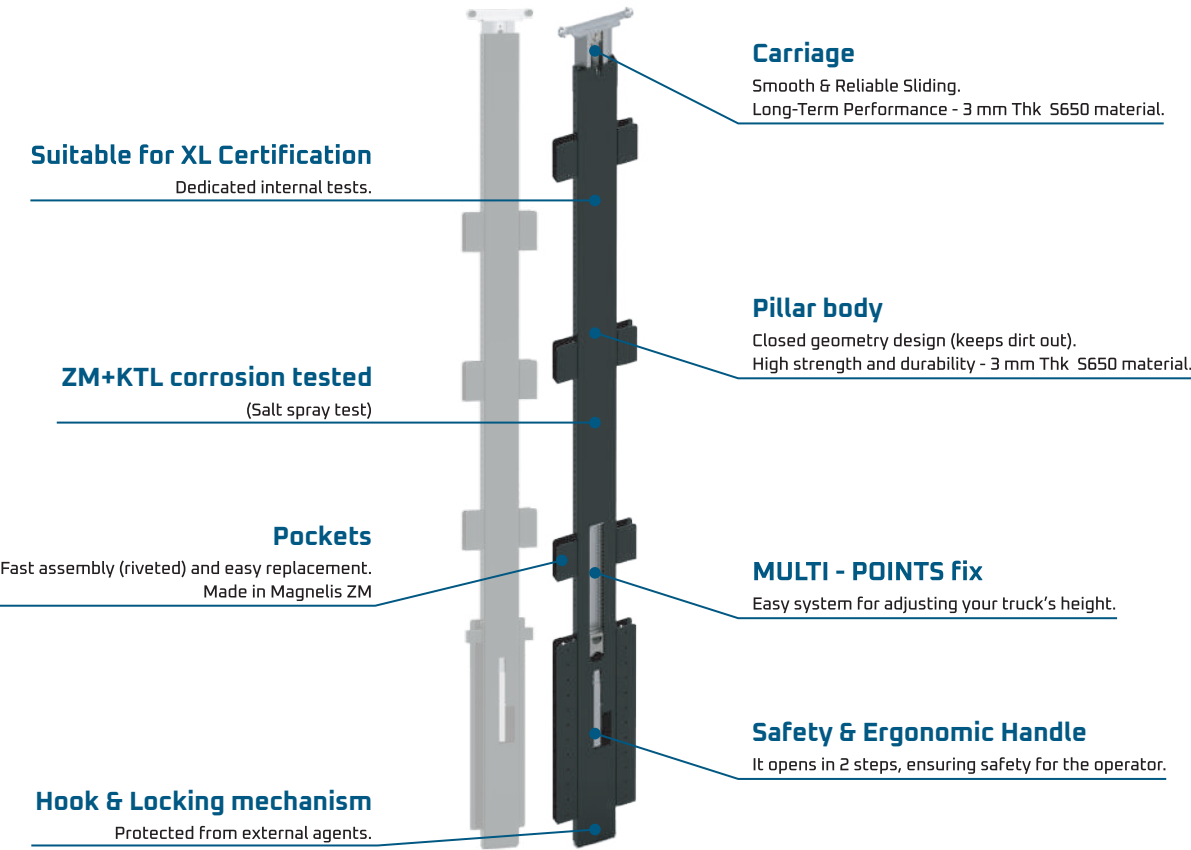

**EN** Autocar's catalogue offers two main central pillars for curtainside vehicles, both designed to ensure easy opening, quick access to the cargo area, and maximum transport safety:

- **MAXI 3:** Specifically designed for SLIM, STANDARD BILINE, and SMART roof profiles, it is available with or without a lifting system, and with or without multipoint fixing. Its key features are strength and lightness.
- **MAXIDUO:** Designed for vehicles equipped with side boards, it is compatible with SLIM, STANDARD BILINE, and SMART roof profiles, with or without a lifting system.

**IT** Nel suo catalogo, Autocar propone due piantoni centrali principali, entrambi progettati per garantire un'apertura facile, un rapido accesso all'area di carico e la massima sicurezza del trasporto:

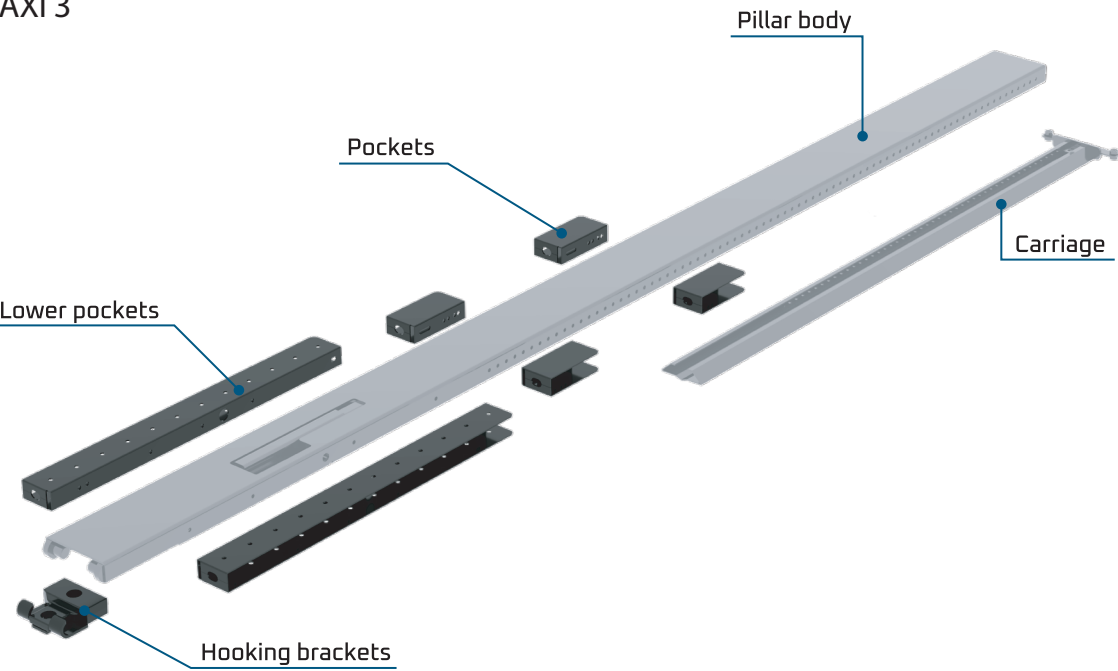

- **MAXI 3:** Specifico per travi SLIM, STANDARD BILINE e SMART, è disponibile con o senza sistema alza-abbassa e con o senza fissaggio multipunto. Si distingue per il perfetto equilibrio tra resistenza e leggerezza.
- **MAXIDUO:** Pensato per i veicoli allestiti con sponde laterali, è compatibile con travi SLIM, STANDARD BILINE e SMART, con o senza alza-abbassa.
